Allowable Subject Matter

2. Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or would not have rendered obvious a system (Fig. 4) for separating a video signal into a luminance signal and a chrominance signal, the video signal being sampled from a composite color TV signal according to a sampling frequency, such as claimed in claims 1-13, the system: generates (item 84) an SLFD according to the target video signal and the plurality of reference video signals; generates (items 94, 96) a UDFD and a plurality of VRVSs according to the target video signal and the plurality of reference video signals; generates (item 92) a VCS according to the UDFD and the plurality of VRVSs; generates (item 98) the chrominance signal of

the video signal by determining the HCS (item 82), the VCS (item 92), and the SLFD (item 84); and generates (item 100) the luminance signal of the video signal according to the chrominance signal of the video signal and the plurality of reference video signals.

The closest prior art, Kim (US 5,686,972), Shih et al (US 7,092,038), and Tanigawa (US 6,999,130) disclose conventional system for separating a video signal into a luminance signal and a chrominance signal, either singularly or in combination, fail to anticipate or render obvious the present invention as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
